DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. **Claim1** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites “wherein said isolation groove is located between second support.” It is unclear how the isolation groove can be between a single support. For purposes of the art rejection below, it is assumed the groove is between said second support and another support.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. **Claims 1-2 and 5-8** remain rejected under 35 U.S.C. 102(b) as being anticipated by Mazed, US Patent 6,411,642 (hereinafter referred to as Mazed).

5. **For claim 1**, Mazed remains applied as to claims 1, 3-4 in the previous action.

Further Mazed teaches the isolation groove is located directly between said second support and another support.

6. **For claims 2 and 5-8**, Mazed is applied according to the previous office action.

Claim Rejections - 35 USC § 103

7. **Claims 9-12** remain rejected under 35 U.S.C. 103(a) as being unpatentable over Mazed in view of Spear, US Patent 6,075,800 (hereinafter referred to as Spear) according to the previous office action.

8. **Claim 13** remains rejected under 35 U.S.C. 103(a) as being unpatentable over Spear, in view of Mazed, and further in view of Mitsuhashi, US Patent 6,199,561 (hereinafter referred to as Mitsuhashi).

Response to Arguments

9. Applicant's arguments filed 5/6/2008 have been fully considered but they are not persuasive.

10. Applicant argues that the trenches in Mazed are removed by a substantial distance from the supports and are therefore distinguished from the claimed invention. Applicant argues that the distance between the groove and the ridges is smaller than in the prior art. While this may be true, the proximity is not claimed in the specification, and the prior art reads on the claim.

11. In regards to the ratio of support width to chip width, as the applicant points out, the distance between the ridge and the isolation groove is about 250 μm in the prior art. As shown in figure 1c, the size of the support ridges is 20 μm in Mazed. The ratio in

Mazed is therefore about 16% which is less than the 50% or 52% required by the claim limitation.

Conclusion

12. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
